

Product Brochure

# Applelec Eco Lightbox

If we told you, you could get the same quality signage product but with a lower impact on the environment, the choice would be a no brainer, right?

Our new Applelec Eco Light Box offers the same vibrant, quality finish that you have come to expect from standard products but in a more sustainable way.

### Recycled bottle backlit skin

Manufactured from recycled plastic bottles (2 bottles per meter squared) and printed with water-based, non-toxic, inks, these interchangeable, recyclable, eco skins offer flexibility in messaging, allowing you to re-use the frame time and time again.

### Wood-pulp backing

This environmentally friendly alternative to rigid plastic not only reduces the overall weight of the lightbox but is

- 100% recyclable as paper waste
- 100% fibre based
- Withstands store conditions inc. varying temperature & humidity
- High strength and rigid
- High quality coated paper liners applied either side with natural starch acting as the adhesive
- Manufactured using locally sourced PEFC wood
- No bleaching or chemicals
- Environmentally friendly production using closed loop water to conserve natural resources, heat recovery systems and hydro plants

## Key Features

- Lightweight 1sqm = 4.2kg
- Slimline 32mm profile
- Recycled bottle, interchangeable skins
- wood-pulp backing
- Environmentally friendly components
- 100% recyclable
- Highly energy efficient LEDs
- Designed for disassembly and recycling

## Recycled and recyclable frame

Created using fully recyclable stainless steel or aluminium shells with a choice of eco backboards to suit your project, this 32mm deep lightbox uses less material than standard extruded lightboxes and are constructed for ease of disassembly and recycling at the end of the products life.

## Bright, highly energy efficient LEDs

Features prism lens technology, which captures otherwise wasted light and redirects it towards the illuminated surface, providing wide, even illumination and a massive increase in efficacy.

### Key features:

- 24v
- 50% higher efficacy
- 163 lumens per watts
- High output
- Quality components
- Ideal for shallow lightboxes 40mm deep and below
- Balances brightness and spacing for incredible loading of 44 (long) sticks per 100w power supply
- Maintains colour consistency over life of product
- 5 year parts & labour warranty
- Available in 4000k & 6500k to match both warm and cool colours as well as skin tones that are crucial in a retail environment
- The pre-wired system, provides a greater degree of protection against accidental damage when replacing graphics.
- WEEE regulated

## Brightline 2 LP Features

- Prism lens technology
- 24 VDC
- 163 lumens per watts
- 50% more product per power supply
- Available in 4000k and 6500k
- Pre wired system
- 5 year parts and labour warranty
